More info :

Even though The Ice Samurai embodies the idea of wearable art with the nth degree, this Japanese LED observe does after all tell the time plus does thus actually effectively too!

Tap the best switch found on the proper side of the timepiece plus see the screen light up like fireflies over an unholy grave. Tap the bottom switch with result in the numbers blink (this really is with change the time).

In Time mode, the best row represents hr info, when the bottom row represents minutes info. In Date mode, top plus bottom represent month plus day.

Q. How do I change the time plus date about this observe?

A. Press the lower switch found on the appropriate side of the observe. This might result the active setting with blink. Continue pressing the lower switch till we arrive at the setting you need to change. Next, click the best switch with change the data.

Q. What colour is this observe precisely?

A. Depending found on the ambient light conditions, this observe occasionally looks gun-metal silver. At different instances it looks light silver. Other occasions it looks virtually black or deep Onyx. Why for this might be the scratch-resistant electroplated finish of the Ice Samurai. This results inside a refractive surface
