Be The Belle Of The Ball With A Pair Of Chandelier Earrings

Women have always favoured wearing earrings even with the simple outfits. These earrings are available in many different forms. [Chandelier earrings](#) are one of the types.

You may be wondering what one is right now.

The earring is given a pretty look with accessories hanging on the bottom of them. Although the chandelier earrings look large they have a light weight material structure which prevents an uncomfortable feeling. Whatever style statement you are looking for a chandelier earring will be right for you whether it is a shoulder grazing pair or subtle but elegant stud effect. It depends on what the design is.

Chandelier earrings come in three styles.

Stud earrings. These earrings stay in with a butterfly the same as any other stud earrings after the earring has been inserted into the earlobe.

Hook. Once put in place the hook style earring simply stays in place as the hook refrains it from moving. Because the hook is bent it helps keep the earring in place.

Clip on. Clip on earrings are really versatile and easy to use if you do not have your ears pierced. The great design of them means they just clip onto the earlobe however are not a popular choice as most women already have their ears pierced.

The wire used for chandelier earrings are mostly made of silver or gold and some are also made of stainless steel. Stainless steel is a popular choice of material to use because some people have reactions to gold or silver and others don't like cheap material to be used. Also the stainless steel choice of earring is often cheap.

The face cut of an individual matters a lot. If you have a more wider face shape then try a long elegant but simple style of earring whereas if you have a longer face try wearing a pair which are wider at the base. And when worn, [chandelier earrings](#) look pretty.
