# **Casio Watches - Casio Marine Ana-Digi Men's Dive Watch #AMW320R-1EV Review**

When we think about Casio watches, most of us certainly picture those useful, efficient, multi functional yet economical watches. Casio is normally not recognized as a manufacture of luxury or special utility watches and surely not for the diving watches. But there are some exceptions to this common perception such as Casio marine Analog digital men's dive watch model number AMW320R-1EV. This striking watch has been in the market for a long time now and the sales numbers are enough to denote how successful and popular this model has been.

The watch has a beautiful black large dial wrapped in a stainless steel case with a rubber strap. The stainless steel case adds glory to the overall beauty of this black dial watch and provides rugged protection to the internal components and also guards the watch from the water leakage. However, with 45 mm case diameter this watch is very big as compared to other dive watches. You will have to find a classic, vintage dive watch in order to match the large size of this one. As the name ana-digi suggests, this Casio watch displays dual time on it's dial. The analog part of the display is very huge as compared to the digital display. The digital display can offer you time from a different time zone, making it so easier to keep up between two different times zones, when you are on a business trip or traveling abroad for leisure diving. You do not have to adjust the analog display time in order to switch between time zones. With a push of a button you can easily change the time in digital display. The Casio AMW320R-1EV watch also features a daily alarm and an auto calendar to keep you within scheduled time frame all the times.

This is super tough, dependable, solidly designed well-priced diver's watch from Casio watches. Even if you are not so kind and gentle with your watches, the tough design of this watch will not disappoint you. You can happily wear this watch daily while diving or playing. The AMW320R-1EV from Casio watches has mineral crystal coated dial window, which is very superior anti resistant coating and minimizes the scratches on the dial of the watch. The battery of the watch ideally lasts around two years, which is fairly good. This certainly is a big watch with a great design for a reasonable price. Even though the watch is large but it's not too heavy for the size. The watch is rated water resistant up to 100 meters.

However, some people have noticed that the resin strap in this watch seems to break after continual use for some months and it will develop cracks and then eventually tear. The alarm chimes are also not so loud in this watch. Although, the watch has luminous marker on the analog dial, but there is no light on the digital display. If you can ignore these little drawbacks of this magnificent watch, then this Casio AMW320R-1EV is certainly a great investment. You definitely can not beat the features, durability and value for money this watch has to offer.
