Pave Cushion Cut Rings

There are many fine examples of [pave cushion cut ring](#). The Romans were said to be the first to wear Wedding Ring they call them the betrothal or the truth ring. While the putting of stones on the Rings were said to be in the medieval time where only the rich and those who can afford puts colorful stones in their band while those that cannot afford fashioned a ring with two clasp hand.

The ring with two clasp hand is called faith or Fedde ring. On the 18th century diamond became more accessible and rings or Rings with more than one diamond became the trend. And the development or Proposal Rings improved through time many designs, cuts, and settings were discovered.

Cushion Cut is popular especially among Ring however it is rare to find this type of cut diamond Ring these days and if ever you find one you will need big cash to purchase them.

Cushion usually have square to rectangular shaped with rounded sides and takes 4 or more prongs to hold the stone in place. However this setting can be fragile for its prongs can get easily caught in clothing that would bend the prongs and loosen its grip on the stone, this is its disadvantage. While its advantage would be is that with this setting you can easily clean the stone.

Today you can find Pave Cushion Cut Engagement Rings in jewelry shops, a pave features lots of tiny stones or diamonds encrusted along the band of Wedding Rings or any rings in other cases you can also find them around the center stone or diamond which give of an appearance of a continuous diamond surface.
