Synthetic Diamonds Come In Amazingly Beautiful Varieties

In all of the world there is definitely no other gem that gets quite the same number of gasps per year as diamonds. This really is a desirable gem with lots of uses and practically a culture of its own today, too. Let us research a bit of the history behind gemstone diamonds to determine what we could learn.

Obviously, while diamonds are definitely part of the world of jewelry, they have many additional uses other than ornamental purposes. They're used in many manufacturing applications such as in drill bits, scalpels and other essential instruments. However, the varieties used as fine jewelry have to first be cut. An elaborate process is undergone to transform the unrefined jewel into the gem we all know and adore. Based on Wikipedia ([http://en.wikipedia.org/wiki/Diamond_\(gemstone\)](http://en.wikipedia.org/wiki/Diamond_(gemstone))) the tradition of expensive diamonds as gems goes all of the way back to around 400 years BC. Today the bulk of the jewels we have are extracted from Africa and Asia, but there are plenty other areas where diamonds come from, these are simply the most well established producers.

What is fascinating to notice is that diamonds being chosen for the engagement ring is a comparatively modern concept that started out during the late 1930s. The reason for this sudden surge in diamonds will be that they had been located in large quantity in South Africa at that time. Prior to this time in history, it would have been challenging for families to afford such a purchase. The tradition of diamonds becoming preferred for marriage rings is prefaced by having appeared among the Romans, however in that illustration it had been seen as a gem bearing the supernatural power to help people get along and not just as a symbol of lasting beauty.

Today, you can view diamonds of man-made or natural types in a variety of stores, ranging from a department stores jewelry section to a more customary [austin jewelry](#) store. We possess a fairly well unspoken interpretation of these jewels and they still beguile us, even today. The marketplace for jewelry containing diamonds is almost \$60 billion as of 2002 according to (<http://www.awdiamonds.com/article-8.html>). It is incredible to view how far the size of this industry has come while at the same time not diverging too far off from the basic roots of our human fascination with them: they are beautiful and hold fascinating properties. This alone ensures diamond jewelers that sell [austin engagement rings](#) will almost definitely always have an eager audience for things they create.

Like we have seen, some of how we perceive diamonds has been with us for ever and some of it is comparatively modern. One thing is for sure, though, and that's they are undeniably one of a kind jewels. It's easy to determine why they would be preferred for significant romantic occasions.

This was written by Michael Crane whom is a precious stone authority and former lawyer. He has owned and operated a jewelry store in [austin engagement rings](#) being the specialty for clients regarding one of the most incredible decisions in their life.
